I-MTTS ARENA

INTERACTIVE MULTI-TARGET TRAINING SYSTEM

The Interactive Multi-Target Training System ("i-MTTS") enables wireless communication allowing each of the i-MTTS targets to "communicate" with each other to engage the shooter in a wide array of training modes, including standalone shooting, steel plate shooting, tactical training/chase the ball, shoot/no shoot, double speed shoot/no shoot, and double tap.

The i-MTTS targets do not require the use of a computer or app, and run simply off of AAA batteries, which are included. Each base unit also comes with 4 assorted targets, varying in both shape and size. These targets are designed to be used with a the SureStrike™ Laser Cartridges (in either red or IR) in the shooter's own double action pistol, or one of Laser Ammo's Advanced Laser Training Pistols/Recoil Enabled Training Guns.

The i-MTTS System Controller is offered as a stand-alone unit or in a combo package. This wireless control unit allows the user to control their target system from a distance. A simple button will rotate between the different training programs, view, scroll and toggle between "split time" and "total time" performance results, set automatic or manual "restart", define or randomize delay time for the "start signal", define needed "hits" on target, set training program length, sound and light response, extend target range, define sub groups and more...

RECOIL ENABLED TRAINING

TAKE DRYFIRE TO THE NEXT LEVEL

Check out the Recoil Enabled Pistol in action!

Safe and Realistic Firearms Training – Anytime, Anywhere.

Take your training to a whole new level. Many shooters find recoil enabled training to be the most realistic way to maintain and perfect their shooting skills indoors, without a live range.

Force on force airsoft training is commonly used by the military and Law Enforcement and has become more popular among shooters due to its low cost, full blow back, and automatic reset of the firearm. The realistic look and feel of the firearm reinforces muscle memory and enhances safety skills of the shooter.

Using a recoil enabled pistol or rifle adds realism to training and is the best way to train for real life situations, with simulated sound and recoil.

Our Recoil Enabled Firearms are completely safe, and the training costs a fraction of what a day at the range with live ammo training would cost.

Pair one of the Recoil Enabled firearms with the Laser Ammo I-MTTs reactive targets or Smokeless Range® and take your shooting skills to a whole new level.

ADAPT FROM 9MM TO 40MM GRENADE LAUNCHER & EVERYTHING IN BETWEEN

The SureStrike™ Laser Cartridges can also be used with the Laser Ammo Caliber Adapter System to fit a variety of calibers for semi-automatic pistols, revolvers, shotguns and rifles.

The unique Caliber Adapter System allows the 9mm SureStrike™ Laser Cartridge to be used in multiple calibers, eliminating the need to buy a separate cartridge for each caliber.

No tools are required for installation. Simply thread the adapter into the 9mm SureStrike™ Laser assembly and you are ready to go.

All semi-automatic adapter rings are used with the 9mm Action Cap and the UhrSecure Safety System (safety pipe, extension and nut.) The patented UhrSecure safety system is used for visual indication that the gun is safe and aligns the laser with the barrel, making it the safest and most accurate laser in existence.

**All semi-automatic pistol adapter rings require the use of a safety pipe and nut.*

INTERCHANGEABLE CAPS

"REFILL" YOUR CARTRIDGE & CHOOSE DRYFIRE OR BORESIGHT

Scan QR code to browse our assortment of interchangeable action caps.

A unique ability of the SureStrike™ training system is to be able to change the functionality and behavior of the laser cartridge according to your training needs. By using interchangeable Action Caps, each having a different program, the user can decide if they want to dry fire, enable bore-sight mode or both.

This feature makes SureStrike™ the most versatile dry fire training system available today. The SureStrike™ Action Caps have a microprocessor controlled primer which activates the SureStrike™ and also performs as a snap cap, keeping the firing mechanism safe from damage while dry firing.

The SureStrike™ Vibration Cap is not activated by the firing pin therefore it doesn't have the primer. Instead, it is specifically programmed and built for airsoft use with one of our airsoft adapters.

We guarantee all of our Action Caps for at least 5,000 shots, although many shooters have reported thousands of extra shots from their SureStrike™ units. By simply replacing the Action Caps, the shooter can refill the SureStrike™ as many times as needed.
